

Classic Stone

Classic Stone

Classic Stone Limited, a New Zealand owned company (established in 2000) is renowned for the high quality, authentic stone veneer products that it manufactures for both the residential and commercial markets nationwide.

Classic Stone's inspiration has come from the beautiful natural stone found throughout New Zealand. From the first settlers to this very day, the timeless and unique qualities of stone have long been desired. It is with great pride that Classic Stone brings to you our manufactured stone veneer profiles.

These profiles bring a level of authenticity that is second to none. This is achieved firstly by moulding directly from the finest of New Zealand's natural stone e.g. Central Otago schist and Canterbury river stone. This enables us to accurately reproduce natural stone textures onto our individual stones. Secondly, Classic Stone has developed its own unique colouring system which allows us to replicate the

beautiful and intricate colour tones of New Zealand stone with incredible detail and realism. In fact the final reproductions of colours and textures are so real it is difficult to tell the difference from natural stone. It is not enough for our stone to look good from afar; we believe it also has to withstand the closest scrutiny.

Our ability and dedication to reproduce these timeless qualities, has seen Classic Stone become the premium stone veneer system in New Zealand.

The Classic Stone veneers are ideal for new and existing homes, yet also very suitable for commercial market applications such as hotels, wineries and resorts. This strong durable veneer can also be used for landscaped applications, from retainer walls through to planter bins and entrance ways. Whether it be indoors or out, the stone is both easy and fast to install, and being so lightweight means there is no need for additional supports such as footings or wall ties.

Why do people choose Classic Stone?

- A tried and proven product that can be trusted
- A cost-effective solution
- Creates a home of distinction and character
- Unique colouring system created specifically to match NZ stone
- High level of quality and authenticity bringing incredible realism
- Individual stones (not panels)
- Speed of installation
- Very low maintenance
- Installation service available by local installers
- Independently appraised - meets the requirements of the NZ Building Code
- 15-year product warranty

High Country Boulder
Colour: Grey Rust

Mountain Ledge Stone

Colour: Queenstown Grey

Our new profile Mountain Ledge Stone is a result of combining what our clients like the most – the contemporary style of a modern ‘lineal-schist’ look with the rustic traditional textures often found in New Zealand shale. It can be installed in a tight stacked-stone style, or a mortar-joint style.

Colour: Queenstown Grey

Due to its 50mm average thickness, it has the advantage of casting shadow, enhancing its natural appearance. This profile comes in varied lengths from 100 to 400mm long. Colours: Tarras, Wanaka Blend, Central Brown, Queenstown Grey, Alpine Grey.

Colour: Queenstown Grey

Colour: Wanaka Blend

Southern Alps - MasterFit

Our Southern Alps MasterFit profile is similar to our Southern LedgeStone profile in that it also has a ledgeStone layout, but with two unique differences: the addition of some larger feature stones, and MasterFit. The innovative MasterFit system that we developed utilises a unique installation method that enables the installer to install the stone faster without any loss of quality or authenticity, and could result in a saving of labour costs to the client. The average thickness is 30mm, with stone length ranging from 100 to 400mm.

Colours: Tarras, Wanaka Blend, Central Brown, Queenstown Grey, Alpine Grey

Southern LedgeStone

Colour: Tarras & Queenstown Grey

The Southern LedgeStone profile incorporates all the rustic textures and colours found in our beautiful New Zealand schist, and portrays these in a modern stacked-stone profile that is very popular with new homes across the country. The average thickness is 30mm, with stone length ranging from 100 to 450mm.

Colours: Tarras, Wanaka Blend, Central Brown, Queenstown Grey, Alpine Grey.

Colour: Wanaka Blend

Colour: Wanaka Blend

Colour: Tarras

Colonial Schist

Colour: Tarras & Central Brown & Queenstown Grey

Colour: Tarras & Queenstown Grey

Colour: Queenstown Grey

The Colonial Schist profile presents the random and rugged edges that are typical of traditional New Zealand schist. The textures have been moulded directly from native schist of the Central South Island, and the colours have been developed specifically to match those subtle shades found in stone around the region. The Colonial Schist profile comes in a variety of shapes and sizes, with stone length ranging from 100 to 450mm, with the average thickness being 30mm.

Colours: Tarras, Queenstown Grey, Central Brown, Wanaka Blend, Alpine Grey.

Colour: Queenstown Grey

Mountain Shale

Colour: Tarras

Colour: Grey Rust

The Mountain Shale profile brings together all the qualities of its natural mountain stone counterpart; rugged with deep undulations, and sharp edges with irregular shapes. It is an overall deeper profile with a strong character. The shape of the profile has a lineal orientation with an average thickness of 45mm.

Colours: Tarras, Grey Rust, Central Brown, Wanaka Blend, Alpine Grey.

Colour: Tarras & Grey Rust

New Zealand Basalt

Colour: Grey with bold rust highlights

Colour: Grey with subtle rust accents

Colour: Grey with bold rust highlights

The New Zealand Basalt profile replicates many of the natural basalt properties with chiselled textures and deep grey colour tones. It has the traditional straight-edged square and rectangular shaped blocks in various sizes, so the client can choose what pattern they like. The stone in this profile has an average thickness of 35 to 45mm.

Colours: Grey with subtle rust accents, Grey with bold rust highlights

Colour: Grey with bold rust highlights

High Country Boulder

Colour: Tarras

Colour: Grey Rust

Colour: Grey Rust

The High Country Boulder profile with its very large random shaped stones makes an impressive rustic statement wherever it is featured. It has rough uneven textures moulded from the fieldstones found in the South Island high country. The stones in this profile come in a variety of shapes and sizes from 200 to 400mm with the average thickness of 35 to 45mm.

Colours Tarras, Grey Rust.

Colour: Grey Rust

Canterbury River

The Canterbury River profile is part of the River Stone range and has been created for those who would prefer an overall smaller and longer river stone look, which is installed in a modern lineal style. The stone in this profile comes in a variety of shapes and sizes (typically of a lineal nature) with the average thickness being 30mm.

River Stone

The River Stone profile is moulded directly from stones collected from our very own South Island rivers, and has all the variations you would expect from a river stone: smooth in overall texture yet with lines and crevasses, and predominantly grey, but also with off-shades such as fawns and browns. The stone in this profile comes in a variety of shapes and sizes (typically of a round nature) with the average thickness being 35mm.

Trim Products

Capping Stones

These cappers have a rustic appearance so they are the perfect way to finish wall, sills etc

135, 185, 235,
285mm widths,
with varying lengths

Bevelled Sill Stones

These are often used to distinguish between different cladding types, or on a window sill that has no horizontal ledge.

400 x 100mm or 400 x 60mm

Tiles

The natural slate texture and colours make these the perfect complement for your stone work.

500 x 400mm

Corner Stones

Our corner stones bring stone walls and columns to life. They add depth, detail and realism to fireplaces, columns and walls.

Sill Stones

As the slate texture is on the top and sides of these stones, this is a suitable product for a smart finish for your columns, sills and edges.

500 x 200 mm
wide

Pillar Caps

These have a strong schist texture along the edges to give it a natural slab stone effect.

530 x 530mm or
685 x 685mm

Classic Mantels

New to the market are our Classic Mantels that we manufacture using the latest in glass fibre-reinforced concrete technology. This provides strength, durability, and a non-combustible solution to having a natural timber mantel close to a heat source. To transform your fireplace, choose your wood-look colour, and either the solid or 'easy-fit' cavity range.

For further ideas and information, go to our website: <http://classicstone.co.nz/classic-mantels/>

Classic Stone Technical Information

Product Description

Classic Stone products are a medium weight veneer facing, intended for interior and exterior non-structural use.

Approved Masonry Surfaces

Classic Stone can only be installed on concrete block, brick, concrete tilt-up panel, and BGC Fibre Cement Stonesheet.

Installation Instructions/Drawings

Installation instructions and PDF/DWG drawings can be downloaded from the Technical page on the Classic Stone website.

Warranty

Classic Stone provides a 15 year limited product warranty on its decorative veneer products, providing the installation was performed according to the Classic Stone appraisal and specifications.

This 15 year limited product warranty does not cover installation or any damage due to incorrect installation, accident, misuse, abuse or negligence including:

- Settlement of the building or other walls or foundation movement.
- Discolouration or damage due to contact with chemicals, paint, and staining.
- Water blasting.
- Not following the management and maintenance requirements.

The Classic Stone product warranty can be provided upon request from us, or from installers after all the relevant documentation from the installer has been received by Classic Stone.

Clients are advised to request installation warranties from their installer via a producer statement.

Classic Hearths

Classic Hearths is a new uniquely designed product that is manufactured at Classic Stone in a large format single-slab. We use the latest in glass fibre-reinforced concrete technology to make them strong and durable. Each Classic Hearth is hand-crafted to your personal requirements and measurements with impressive natural textures and colours giving you a distinctive bespoke feature in your home. Our stone textures are inspired by our stunning NZ landscapes which have been moulded directly from stone found in the Landsborough Valley on the West Coast. Our wooden ranges Rustic Oak and Silver Beech have the look of sawn wood complete with timber grain, saw cuts and nail holes.
