

Classic Stone

Classic Stone

Classic Stone Limited, a New Zealand owned company (established in 2000) is renowned for the high quality, authentic stone veneer products that it manufactures for both the residential and commercial markets nationwide.

Classic Stone's inspiration has come from the beautiful natural stone found throughout New Zealand. From the first settlers to this very day, the timeless and unique qualities of stone have long been desired. It is with great pride that Classic Stone brings to you our manufactured stone veneer profiles.

These profiles bring a level of authenticity that is second to none. This is achieved firstly by moulding directly from the finest of New Zealand's natural stone e.g. Central Otago schist and Canterbury river stone. This enables us to accurately reproduce natural stone textures onto our individual stones. Secondly, Classic Stone has developed its own unique colouring system which

allows us to replicate the beautiful and intricate colour tones of New Zealand stone with incredible detail and realism. In fact the final reproductions of colours and textures are so real it is difficult to tell the difference from natural stone. It is not enough for our stone to look good from afar; we believe it also has to withstand the closest scrutiny.

Our ability and dedication to reproduce these timeless qualities, has seen Classic Stone become the premium stone veneer system in New Zealand.

The Classic Stone veneers are ideal for new and existing homes, yet also very suitable for commercial market applications such as hotels, wineries and resorts. This strong durable veneer can also be used for landscaped applications, from retainer walls through to planter bins and entrance ways. Whether it be indoors or out, the stone is both easy and fast to install, and being so lightweight means there is no need for additional supports such as footings or wall ties.

Why do people choose Classic Stone?

- A tried and proven product that can be trusted
- A cost-effective solution
- Creates a home of distinction and character
- Unique colouring system created specifically to match NZ stone
- High level of quality and authenticity bringing incredible realism
- Individual stones (not panels)
- Speed of installation
- Very low maintenance
- Installation service available by local installers
- Independently appraised - meets the requirements of the NZ Building Code
- 15-year product warranty

Colonial Schist
Colour: Tarras

Mountain Shale

Colour: Tarras

Colour: Tarras & Grey Rust

The Mountain Shale profile brings together all the qualities of its natural mountain stone counterpart; rugged with deep undulations, and sharp edges with irregular shapes. It is an overall deeper profile with a strong character. The shape of the profile has a lineal orientation with an average thickness of 45mm. Colours: Tarras, Grey Rust, Central Brown, Wanaka Blend, Alpine Grey.

Colour: Grey Rust

Colour: Tarras & Grey Rust

Colonial Schist

Colour: Tarras & Central Brown & Queenstown Grey

The Colonial Schist profile presents the random and rugged edges that are typical of traditional New Zealand schist. The textures have been moulded directly from native schist of the Central South Island, and the colours have been developed specifically to match those subtle shades found in stone around the region.

The Colonial Schist profile comes in a variety of shapes and sizes, with stone length ranging from 100 to 450mm, with the average thickness being 30mm.

Colours: Tarras, Queenstown Grey, Central Brown, Wanaka Blend, Alpine Grey.

Colour: Tarras & Queenstown Grey

High Country Boulder

The High Country Boulder profile has large randomly shaped stones with rough uneven textures, that makes an impressive rustic statement. It is ideally suited for applications such as feature walls, fire places, outdoor patio/entertainment areas, perimeter walls and fencing. The stone in this profile comes in a variety of shapes and sizes, with the average thickness being 45mm.
Colours: Tarras, Grey Rust.

Southern LedgeStone

The Southern LedgeStone profile incorporates all the rustic textures and colours found in our beautiful New Zealand schist, and portrays these in a modern ledgeStone profile that is very popular with new homes across the country. The average thickness is 30mm, with stone length ranging from 100 to 450mm.

Colours: Tarras, Wanaka Blend, Queenstown Grey, Alpine Grey.

Southern Alps - MasterFit

Our Southern Alps profile is our latest innovation and is similar to the Southern LedgeStone profile as it also has a ledgeStone layout, but with two unique differences; the addition of some larger feature stones and MasterFit.

The MasterFit system is the latest in installation methods that enables the installer to very quickly install stone without any loss of quality or authenticity. The efficiency of the system often brings a considerable saving in labour costs to the client. The average thickness is 30mm, with stone length ranging from 100 to 400mm.

Colours: Tarras, Wanaka Blend, Queenstown Grey.

River Stone

The River Stone profile is moulded directly from stones collected from our very own South Island rivers, and has all the variations you would expect from a river stone: smooth in overall texture yet with lines and crevasses, and predominantly grey, but also with off-shades such as fawns and browns. The stone in this profile comes in a variety of shapes and sizes (typically of a round nature) with the average thickness being 35mm.

Canterbury River

The Canterbury River profile is part of the River Stone range and has been created for those who would prefer an overall smaller and longer river stone look, which is installed in a modern lineal style. The stone in this profile comes in a variety of shapes and sizes (typically of a lineal nature) with the average thickness being 30mm.

Trim Products

Capping Stones

The perfect way to finish walls, these cappers have a rustic appearance that also makes them great for hearths, sills and many other applications.

135, 185, 235, 285 mm widths, with varied lengths

Bevelled Sill Stone

These are often used for windowsills, and to distinguish between different cladding types.

400 x 100mm or
400 x 60mm

Tiles

The natural slate texture and colours make these the perfect complement for your stone work.

Corner Stones

Our corner stones bring stone walls to life. They add depth, detail and realism, to fireplaces, columns and walls.

Sill Stones

A really smart looking slate texture makes this stone suitable for everything from columns to sill details.

500 x 200 mm
wide + random
lengths

Pillar Caps

These have a strong schist texture along the edges to give it a natural slab stone effect.

530 x 530mm or
685 x 685mm

Due to variation in lighting conditions, colour shades may vary between images and physical product.

Colour: Tarras & Queenstown Grey

Product Information

Product Description

Classic Stone products are intended for interior and exterior non-structural use, as a medium weight veneer facing, on approved masonry surfaces (e.g. BGC Fibre cement sheet - 7.5mm Stonesheet, concrete block, brick and concrete tilt-up panel) for architectural aesthetics.

Colour Retention

Classic Stone uses a unique two-stage colour process to give durability and quality to its colouring. In order to keep your stone in excellent condition, we recommend resealing. Please contact Classic Stone for details.

Installation Instructions/Drawings

Installation instructions and PDF/DWG drawings can be downloaded from the Technical page on the Classic Stone website.

Classic Stone Appraisal

The fully independent appraisal (copy available from the Classic Stone web site) certifies that the Classic Stone cladding system complies with the requirements of the NZ Building Code, giving the architect, builder and home owner confidence in specifying Classic Stone.

Warranty

Classic Stone provides a 15 year limited product warranty on its decorative veneer products, providing the installation was performed according to the Classic Stone appraisal and specifications.

This 15 year limited product warranty does not cover installation or any damage due to incorrect installation, accident, misuse, abuse or negligence including:

- Settlement of the building or other walls or foundation movement.
- Discolouration or damage due to contact with chemicals, paint, and staining.
- Water blasting.
- Not following the management and maintenance requirements.

The Classic Stone product warranty can be provided upon request, through installers, after all relevant documentation from the installer has been received by Classic Stone.

Clients are advised to request installation warranties from their installer via a producer statement.
